

April 16, 2020

Dear Families,

I would like to share some information that many in our community may find helpful during this challenging time.

The University of Iowa is offering a Tele Mobile Clinic, with free medical appointments delivered online or over the phone. Services are available in English, Spanish, Arabic, and French. No health insurance coverage is necessary to use the service.

The clinic offers information about COVID-19 and general health education, while also connecting individuals and families with mental health counseling, if needed. To sign up and set an appointment, simply call or text 319-535-2684.

We hope you find this information useful during a time in which technology can help us maintain social distancing. Please stay safe and healthy!

Sincerely,

Dr. Mandy Ross
Superintendent
